

Cheat sheet: Implementing the ISO 27001:2022 standard with ManageEngine

What is the ISO/IEC 27001 standard?

The ISO/IEC 27001:2022 standard is part of the ISO/IEC 27000:2018 family of information security standards and controls. It provides technology-agnostic requirements for implementing an information security management system (ISMS). This includes controls for ensuring information security, cybersecurity, and privacy protection. Being certified against this standard helps establish trust because it serves as evidence of strong information security practices.
